Work Experience

Hotels.ng
Nigeria
DEVOPS ENGINEER
June 2024 – August 2024

- Built CI/CD pipelines using GitHub Actions for automated Build, Test and Deployment processes ensuring smooth updates for the Telex app.
- Implemented Monitoring and Observability solutions using Grafana, Loki, Promtail and Prometheus, enabling real-time tracking of the Telex's server and application metrics.
- Configured a Kubernetes Cluster to serve as a Self-Hosted GitHub Actions Runner improving CI/CD efficiency for Telex's cross-platform development.
- Containerized and Deployed a full-stack web application using Docker and configured proxy manager for efficient routing.

Elev8
Lagos, Nigeria
AZURE CLOUD TRAINER (CONTRACT)
January 2024 – Present

- Trained entry level staff of banks (FirstBank, Stanbic IBTC Bank) on the use of cloud services on Azure
- Prepared demos and learning materials on Azure Administration, Azure AI, and Azure Data Services.
- Created hands-on labs and practical exercises to reinforce learning and ensure participants gained real-world experience with Azure tools and services.
- Collaborated with bank IT departments to customize training content, ensuring alignment with organizational goals and compliance with industry standards

Patricia Technologies
Lagos, Nigeria
FULL-STACK SOFTWARE ENGINEER
July 2021 – June 2023

- Implemented and optimized the admin dashboard of the crypto payment management system for the Patricia applications using React.js, Next.js, and TailwindCSS, resulting in an 80% improvement in payment management.
- Wrote and documented CRUD APIs related to customer payments on the Vaunt Laravel application.
- Implemented logging and monitoring using Sentry which helped identify bugs in the application, improving uptime by over 25%.
- Increased the security of the payment admin dashboard by 70% by implementing token-based Two-Factor Authentication, ensuring secure access to the payment system.
- Refactored the data fetching layer of the application to use React Query, reducing duplicated code and improving performance.
- Successfully enhanced the frontend resilience of the crypto payment management system by writing component and integration tests using Jest and Playwright, reducing app crashes in production by 90%.
- Reduced runtime bugs in the production environment of the payment management system by porting the JavaScript-based React application to TypeScript, ensuring smoother performance, type-safety, and efficient debugging.

Skills

Programming Languages: Go, Python, Javascript, Typescript, PHP
